April 2026 STRATEGIC BUSINESS INSIGHTS

1. Overall Monthly Performance

BOMAS Hardware Store generated KES 69,864,836 in revenue and KES 6,160,115 in gross profit during the first 26 working days of April 2026. This translates to an average daily revenue of KES 2,687,109 and an average daily profit of KES 236,928. The overall profit margin stabilized at 8.8%.

2. Departmental Contribution & Margin Analysis

The GENERAL HARDWARE department remains the dominant revenue driver, accounting for 87.7% of total April sales (KES 61,301,331). However, margin analysis reveals that PLUMBING operates at the highest profitability rate (25.4%). Strategic focus should be placed on pushing higher-margin PLUMBING items in May to lift the overall 8.8% store margin.

3. Sales Team Productivity

Sales concentration is notably high among the top performers. Gladys led the month with KES 29,407,278 in sales, followed closely by Betha Odumo (KES 16,509,420). Combined, these top two representatives accounted for 65.7% of the store's total April volume. To mitigate key-person dependency risks, training and mentorship programs should be implemented for the remaining 5 active representatives.

4. May Operational Recommendations

- Balance cross-selling between volume leader (General Hardware) and margin leaders (Plumbing/Electricals).
- Conduct sales training focused on improving the conversion rates and average order values of bottom-quartile representatives.
- Align Minimum Order Quantities (MOQs) with April daily consumption averages to ensure optimal working capital allocation.
