Q1 2026 STRATEGIC BUSINESS INSIGHTS

1. Overall Quarterly Performance

BOMAS Hardware Store generated KES 183,447,102 in revenue and KES 16,495,840 in gross profit during the first 74 working days of Q1 2026. This translates to an average daily revenue of KES 2,479,015 and an average daily profit of KES 222,917. The overall profit margin stabilized at 9.0%.

2. Departmental Contribution & Margin Analysis

The GENERAL HARDWARE department remains the dominant revenue driver, accounting for 87.2% of total Q1 sales (KES 159,937,385). However, margin analysis reveals that PLUMBING operates at the highest profitability rate (25.2%). Strategic focus should be placed on pushing higher-margin PLUMBING items in Q2 to lift the overall 9.0% store margin.

3. Sales Team Productivity

Sales concentration is notably high among the top performers. Gladys led the quarter with KES 74,132,410 in sales, followed closely by Betha Odumo (KES 38,903,951). Combined, these top two representatives accounted for 61.6% of the store's total Q1 volume. To mitigate key-person dependency risks, training and mentorship programs should be implemented for the remaining 7 active representatives.

4. Q2 Operational Recommendations

- Balance cross-selling between volume leader (General Hardware) and margin leaders (Plumbing/Electricals).
- Conduct sales training focused on improving the conversion rates and average order values of bottom-quartile representatives.
- Align Minimum Order Quantities (MOQs) with Q1 daily consumption averages to ensure optimal working capital allocation.
